

Baidu (BIDU US)

Impact from proactive business adjustment likely in line with our expectation

We expect Baidu Core business to deliver revenue growth in line with our expectation but slightly slower than market consensus estimates in 2Q24E, owing to the proactive business adjustment to embed more GenAl-related results in search results which are currently under-monetized, as well as the soft macro environment which has weighed on overall advertising budget. However, we are positive that this proactive adjustment could help improve user experience and enhance long-term monetization prospects. Cloud profitability is on expansion track, and the increase in penetration of fully driverless cars, as well as the deployment of new car models could drive unit economics (UE) improvement for Robotaxi business, in our view. We maintain both our financial forecast and SOTP-based target price of US\$183.0 per ADS unchanged. Maintain BUY.

- 2Q24 results preview. We estimate Baidu Core booked revenue of RMB26.3bn in 2Q24, flat YoY but 2.7% lower than Bloomberg consensus, mainly dragged by ads performance, which is likely softer than market expected but in line with our expectation. For Baidu Core ads business, we forecast it to have booked revenue of RMB19.0bn, down 3.0% YoY, mainly due to: 1) proactive business adjustment to embed more GenAl-related search results in search business, which should improve user experience but currently has a relatively low monetization level; 2) milder-than-expected economic growth which has weighed on the growth of overall advertising budget; and 3) fierce industry competition. However, in terms of non-GAAP OP, we expect business operating efficiency improvement to offset incremental Al-related investment, and estimate Baidu Core logged RMB6.5bn in 2Q24, flat YoY, translating into a non-GAAP OPM of 24.7%.
- Ramping up of Al-related cloud revenue drives acceleration in YoY cloud revenue growth. We estimate Baidu Cloud revenue growth of 14% YoY in 2Q24, improved from 12% in 1Q24 and 5% in 2Q23, driven by the ramp-up of Al-related cloud revenue. The increased contribution of Al-related cloud revenue should also drive margin expansion given that it enjoys a relatively higher margin compared to segment average.
- Increasing penetration of fully driverless cars and RT6 model to drive significant UE expansion for Robotaxi. Baidu highlighted that the rides provided by fully driverless vehicles accounted for over 70% of the total for Robotaxi in April 2024 in Wuhan, up from 45%/55% in 4Q23/1Q24, and expected it to reach 100% in the coming quarters. Also, Baidu noted that the new-generation car RT6 was only priced at RMB204.6k, significantly lowered from that of c. RMB480k for RT5, which could help reduce hardware depreciation cost post deployment. We see the increasing penetration of fully driverless cars and reduction in hardware depreciation cost as key drivers for Robotaxi's UE improvement and conducted operation scenario analysis in Wuhan in our previous note (link). Management targets to achieve UE breakeven for Apollo Go operations in Wuhan in the near future.

SOTP valuation of US\$183.0 per ADS

Our SOTP-based target price is unchanged at US\$183.0 per ADS, which translates into 17.1x 2024E PE on a non-GAAP basis, or 11.1x if excluding net cash. Our SOTP-based target price comprises, per ADS:

- 1) US\$69.2 for Baidu Core (mainly including the core search and feed ads business, excluding Apollo and Baidu Cloud), based on an unchanged 7.0x 2024E non-GAAP PE;
- 2) US\$1.8 for Apollo ASD, based on 2.0x 2030E revenue, and discounted back using a 13.0% WACC.
- 3) US\$32.2 for Baidu Cloud, based on 3.9x 2024E PS;
- 4) US\$64.6 of net cash;
- 5) US\$15.2 for iQIYI and other investments, with a 30% holding discount applied to the share price of US\$21.7.
