SANY International (631 HK)

Key takeaways from Hong Kong NDR

We hosted NDR for SANYI in Hong Kong last week. Investors' questions are mostly around large mining trucks growth outlook and the potential handling of solar business. Key highlights: (1) Impressive backlog of mining trucks (overseas) which increased to RMB4.5bn in mid-Apr from RMB3.6bn in Mar; (2) Large-size logistics equipment will see visible margin expansion due to solid backlog with higher ASP; (3) Management has yet to decide the future of solar business (disposal or asset impairment) which is running at an annual loss of ~RMB300mn (including depreciation of RMB200mn which is non-cash). We fine-tune our 2026E/27E/28E earnings forecast by -3%/+1%/+3%, to reflect higher profit forecast on mining trucks and telescopic forklifts, but lower forecast on road headers, CCMUs and solar. While we expect the 1Q26 results (to be announced on 20 May) will likely be under pressure due to weak new business segments, we are positive on SANYI's structural growth outlook given the rising contribution of large mining trucks. **Reiterate BUY** with new TP of HK$18.9 (previously HK$19.5), based on unchanged 20x 2026E P/E (equivalent to the peak level since 2017, to reflect the rising earnings visibility driven by the commodity upcycle).

- **Large mining trucks backlog and margin.** Large mining trucks backlog (overseas) further increased to RMB4.5bn by mid-Apr. With delivery cycle of 3-6 months, most of the orders will likely be recognized in 2026E. More importantly, SANYI has started winning "billion-scale (RMB)" tenders related to large metal mines recently. Large mining trucks carry 35-40% gross margin overseas, which is much higher than that of wide-body trucks (China: 20%; overseas: 30%).
- **Attractive TCO for customers.** SANYI's large mining trucks are equipped with 2 sets of Weichai's engines (2338 HK/000338 CH, BUY), and therefore able to achieve a substantially lower cost compared with using Cummins' (CMI US, NR) engines. SANYI's large mining trucks ASP is only 5% lower than a major US competitor's. However, SANYI's models can help clients achieve 15-20% lower diesel consumption, and 20-30% lower maintenance cost. This makes SANYI's trucks highly attractive from the perspective of TCO. SANYI targets to achieve 10% global market share in 2028E (vs 4-5% in 2025).
- **High visibility of aftermarket revenue going forward.** Given that aftermarket revenue accounts for ~3/4 of the total revenue over the useful life of mining trucks, SANYI believes the aftermarket income will be highly visible following the strong truck sales in 2026E.

Large size port machinery (STS cranes & yard cranes): The latest backlog reached RMB5.3bn, including RMB4bn from overseas clients. The backlog carries 22-22% gross margin, which is much higher than the 18% gross margin recognized in 2025. SANYI revealed that an improving competitive landscape has helped boost the higher margin.

Telescopic forklifts: SANYI's telescopic forklift revenue dropped 10% YoY to RMB1.07bn in 2025, which was largely due to the increased tariffs imposed on India by the US in early 2025 (SANYI's telescopic forklifts were mainly produced in its Indian production base). That said, SANYI expects substantial growth (potentially >100% YoY) in 2026E, as production has been shifting to Indonesia. Meanwhile, SANYI's Turkey production base is under construction and is expected to commence production in 2028E, which will offer further growth potential.

Capex: SANYI expects the annual capex to be ~RMB1bn over the coming years, based on the current business plan.
