

# Ping An Bank (000001 CH)

## Profit expansion back on track; Asset quality a bright spot

After a sharp decline in 2Q20, PAB's earnings regained positive growth of +6.1% YoY in 3Q20. As such, YTD profit contraction narrowed to -5.2% in 9M20 YoY from -11.2% YoY in 1H20. Key results highlights are fast pick-up in retail loans, improving asset quality, and robust fee income. We stay upbeat on PAB's 4Q20 outlook, given: 1) strong macro trend, thus waning policy intervention on banks' earnings; 2) continued recovery in consumption and retail credit; 3) interbank rates will likely retreat on loose liquidity, easing NIM pressure; and 4) above-peers provision coverage offers room to lower credit cost.

- **Results positives: 1) Loan growth was solid at 3.1% QoQ**, mainly driven by retail loans (+5.7% QoQ). In particular, new mortgage (+7.5% QoQ) and auto loans (+10.4% QoQ) remained strong, and credit card resumed expansion (+3.0% QoQ) from 1H20 contraction. Proportion of retail loans increased to 58% of total loans as of 3Q20. **2) Asset quality improved notably**. PAB accelerated NPL disposal in 3Q20. As a result, NPL ratio dropped 33bp QoQ to 1.32%, and provision coverage further climbed to 3.4ppt QoQ to 218%. NPLs still covered 104% of >60day overdue loans, indicating stringent loss recognition. **3) Net fee income was up 32.6% YoY**, likely on strong bank card and agency services fees. **4) Cost-income ratio fell 1.4ppt YoY to 29% in 3Q20**, suggesting better operating efficiency; **5) Stable expansion in retail client base**. Number of retail/ wealth/ private banking client rose 1.9%/4.5%/8.2% QoQ. Retail AUM increased 7.2% QoQ to RMB2.49tn.
- **Results negatives: 1) NIM declined 11bp QoQ to 2.48%**. Loan yield slid 32bp QoQ, likely on write-off in retail loans past due and the Bank's more prudent lending appetite. Lower deposit cost was partly offset by rising interbank funding cost, as market rates rebounded in 3Q20. **2) Trading and investment gain was down 72% YoY**, likely due to bond yield hike in 3Q20. **3) Deposits rose 2.5% QoQ, slower than loan growth**. LDR increased to 100.5%. **4) Capital position weakened**, with 5bp/10bp QoQ decline in Tier1/total CAR.
- **Maintain BUY and RMB22.8 TP**. We keep earnings forecast unchanged, and our TP of RMB22.8 is derived from 1.5x target P/B and FY20E BVPS of RMB15.2.
